TherapeuticEurythmy-movementtherapyforchildrenwithattentiondefici
Measure Time Frame Percentage of days lost due to unplanned
cardiovascular CV hospitalisation or due to death for any
reason during the individual patient follow-up time. This
study was a 4-year prospective cohort study and referred to
patients with various chronic diseases such as mental,
respiratory, musculoskeletal, headache. The evaluations of
Hamre's group [23 - 27] described the outcome effects of a
"therapy package", which included EYT and other medications.
KardiologischePraxisGolaBernauGermany.Nevertheless, the

retrieved clinical studies describe significant improvements of the symptoms, which can be ascribed to effects of the multimodal treatment approaches of AM.
