Good samples are random samples where any member of the population is equally likely to be selected and any sample of any size  $n$  is equally likely to be selected. Dozens of old and new developers contributed in recent weeks. Please don't fill out this field. CanonicalLtd. Retrieved 26 June If a sample is a good random sample, representative of the population, then some sample statistics can be used to estimate population parameters. The project rapidly accumulated developers, development effort and added features, the majority of OpenOffice. FullName.Retrieved 22 April
