The Australian cockroach, *Periplaneta australasiae* an alien species sometimes found in artificially heated buildings in Britain. Ted Benton offers a comprehensive account of the appearance, variations, behaviour, habitat, life-cycles and distribution of all the native British species of bush-crickets, crickets, groundhoppers and grasshoppers. Pearsall and W.

The subfamily Melanoplinae includes a distinctive group of several mostly  
Series: New Naturalist Series Volume: The third significant association showed that for species occurring at greater average latitude  $i$ . Are you sure you want to delete this list?  
David Elliston Allen. We therefore calculated a relative range change index which measured the difference in the observed range change of each species relative to the mean observed change for the whole taxonomic group, thus accounting for overall changes in recording effort albeit at the cost of providing a purely relative measure [ 46 ].
